

A wide-angle photograph of an industrial waste management facility. In the foreground, several blue metal frames hold large, white, cylindrical gas cylinders, each labeled 'NIPPON GASES'. A person in a white protective suit is walking across the paved area. In the background, there are various industrial structures, including large white storage tanks, a red crane, and a building with a white roof. The sky is blue with some clouds. The image is framed by a dark blue curved shape on the left and bottom right.

# Waste Management Solutions

Your preferred partner on the journey  
towards a cleaner tomorrow

**LAMOR**

## Maximizing value and minimizing impact with Lamor

At Lamor, we pioneer sustainable hazardous waste management solutions that transform traditional waste practices into opportunities for economic and environmental growth. Our commitment to a circular economy drives us to extract value from waste materials, contributing to a cleaner and more sustainable world.

### **Expertise in Sustainable Waste Management**

Lamor offers expertise in sustainable hazardous waste management, providing integrated solutions across a range of waste materials, such as waste oils and sludges, chemicals and other liquid and solid hazardous wastes. Whether we are designing, building, or operating, Lamor is ready to provide for a range of industries, such as Maritime, Upstream, Downstream, Manufacturing and production, compliant facilities with cutting-edge technologies and a commitment to the principles of a circular economy.

### **Your benefits**

### **Customized Solutions and Collaboration**

Lamor collaborates closely with customers, providing customized waste management solutions that align with specific operational needs and sustainability goals. From waste forecasting to efficient treatment processes, we ensure personalized and effective solutions for each customer.

### **Comprehensive Services Globally**

Lamor provides end-to-end services across waste management sectors, with a global network of partners. Customers receive seamless integration from waste characterization to operation and maintenance, benefiting from an international perspective that is delivered locally and in compliance with legislative requirements.

## Sludge and waste oil treatment

### Recovering resources and protecting environments

Industries often generate contaminated waste oils and sludges with untapped value. Lamor collaborates closely with customers to manage and extract reusable resources from various hazardous wastes. Our integrated approach ensures effective extraction while minimizing residual materials, contributing to long-term resource reuse.

#### How we operate:

- Waste characterization and compositional analysis
- Identification of value-added waste for extraction
- Tailored waste oil and sludge treatment solutions, including logistics
- Extraction of waste oils and other reusable waste streams
- Design, building, operating, and maintaining fixed and mobile treatment technologies

## Maritime pollution (MARPOL) port reception facilities

### Sustainable solutions for maritime waste management

Lamor leads the way in providing customized and environmentally responsible waste reception services for the maritime industry. Our solutions align with MARPOL standards, ensuring efficient and sustainable waste treatment without causing delays for ships.

#### How we operate:

- Collaboration with customers to forecast waste volumes
- Identification of available land and design of waste treatment solutions
- Delivery of waste recovery, reuse, and recycling targets
- Ongoing operation and maintenance services

## Other hazardous wastes

### Safely managing industrial hazardous waste

Lamor takes on the challenge of safely managing hazardous waste generated by industrial processes. Through close collaboration with customers, we analyze the entire supply chain, adopting secure waste handling, extraction, and treatment methods. Our goal is to eliminate hazardous waste at the source or, if not feasible, repurpose valuable components within the same industry.

#### How we operate:

- Collaboration with customers to forecast waste volumes
- Identifying opportunities to eliminate hazardous waste creation
- Introducing dynamic waste handling, transportation, recovery, and reuse methods
- Deploying proven technologies to safely treat hazardous waste

# LAMOR

Let's clean the world

## Lamor in brief

---

Lamor is one of the world's leading providers of environmental solutions. For four decades, we have worked to clean up and prevent environmental incidents on land and at sea.

Environmental protection, soil remediation and material recycling: Our innovative technologies, services and tailored solutions, ranging from oil spill response, waste management and water treatment to soil remediation and plastic recycling, benefit customers and environments all over the world.

We are capable of vast and fast operations thanks to our connected ecosystem of local partners, steered by our experts. Lamor's share is listed on the Nasdaq Helsinki (ticker: LAMOR). Further information: [www.lamor.com](http://www.lamor.com)
