LAMOR

An aerial photograph of turbulent blue water with white foam, likely from a ship's wake or a storm. The water is a deep blue, and the foam is bright white, creating a high-contrast, textured surface. The perspective is from directly above, looking down at the churning water.

Vessels & Workboats Brochure

Lamor's portfolio of vessels ranges from boom towing boats to ice-class oil recovery vessels. One of the latest additions are the very popular multi-purpose shallow draft vessels designed for safe oil spill recovery operations in coastal waters as well as open sea under adverse weather conditions.

Dedicated oil recovery vessels designed and manufactured by Lamor are in operation worldwide, e.g., in the Arctic Pechora Sea or the Caribbean, and have played a huge role in many of the world's largest oil spill response operations such as the Deepwater Horizon catastrophe in the Gulf of Mexico. Our various sized vessels are designed to be used for multiple tasks for day-to-day operations in every environment from tropical rivers to extreme offshore arctic conditions.

Shallow drafts:

Our shallow draft vessels are designed for safe oil spill recovery operations in coastal waters and open sea under adverse weather conditions. They also serve as workboats in other tasks and operations, as well as support for other vessels.

Landing crafts:

Our landing crafts are designed and tested for excellent and effortless sea handling and maneuverability in rough seas. The V-shaped hull, keel, and stringers give stability and protection when landing on rocky shores. The landing crafts have a high cargo capacity of 1100 - 1700kg (2425 - 3748 lbs) that includes crew.

Workboats:

Our workboats are designed to be a high-value investment that can be used on a daily basis for a variety of operational tasks. We have single-hulled workboats ranging from 12 - 22 meters long, built from marine grade aluminum, with longer ranged workboats being ice-classed for up to 10 cm ice.

Customized vessels:

Our customized vessels are tailor-made for your needs. With over 40+ years of experience in the oil spill response industry Lamor's veteran engineers are true experts within the field, having built hundreds of specialized vessels for all climate and environmental conditions.

Boom Towing Boats:

Our boom towing boats are robust, made out of high-grade marine aluminum with a single level work deck and walk around a fully enclosed wheelhouse with special focus on safe navigation and low noise levels. They are also equipped with a towing post with a releasable towing hook on the aft deck as well as four lifting points.

LAMOR

Let's clean the world

Lamor in brief

Lamor is one of the world's leading providers of environmental solutions. For four decades, we have worked to clean up and prevent environmental incidents on land and at sea.

Environmental protection, soil remediation and material recycling: Our innovative technologies, services and tailored solutions, ranging from oil spill response, waste management and water treatment to soil remediation and plastic recycling, benefit customers and environments all over the world.

We are capable of vast and fast operations thanks to our connected ecosystem of local partners, steered by our experts. Lamor's share is listed on the Nasdaq Helsinki (ticker: LAMOR). Further information: www.lamor.com
